Re: for **Marat Khaitbaev** as Outstanding Researcher and Alien of Extraordinary and Exceptional Ability Professional

Dear Sir or Madam!

My name is Ivan Nikitin, and I am a senior specialist of the department of inter-university relations at the Bonch-Bruевич Saint Petersburg State University of Telecommunications. I have been working in the field of inter-university exchange experience for 17 years, specializing in development of careers and professions for students after graduation.

It is with great pleasure that I write this letter of endorsement for interdisciplinary Specialist Mr. Marat Khaitbaev, whose request for permanent resident status in the United States, in the category of Alien of Extraordinary ability and National Interest Waiver, I wholeheartedly support. Mr. Marat Khaitbaev is an extraordinary and exceptional individual with impeccable credentials and a remarkable international record of publications and Advanced Technology Projects.

Mr. Marat Khaitbaev is a brilliant interdisciplinary specialist whose groundbreaking insights in the field of automobile and environmental engineering have affected, and will continue to affect, numerous fields such as general interdisciplinary mechanical engineering, composite materials development, innovative light emitting technique, laser diodes modification, food compositions and water treatment integrated technologies.

Mr. Marat Khaitbaev boundless imagination and perceptive intelligence are directly responsible for a new and exciting understanding of the innovation process in America and its future innovative development, in support of the new America Invents Act.

As a nationally recognized and internationally established Specialist, I have long been impressed by Mr. Marat Khaitbaev grasp of the global condition of the innovations development process.

I have personally been influenced by Mr. Marat Khaitbaev innovative ideas regarding patent strategy and patent process developments as well as his use of Quality assurance techniques in Solid Works simulation processes in addition to Theory of Inventive Problems Solving (TRIZ) and Algorithm of Inventive Problem Solving (ARIZ).

Most importantly, I continue to find Mr. Marat Khaitbaev contributions of critical importance to the future of our perceptions about new industrial integrated products development.

Our nation needs people like Marat Khaitbaev to help us heal and move ahead with our technical and industrial progress.

Mr. Marat Khaitbaev is an exceptional American without having become a formal American. I have known of his work in the field of engineering developments for over few years.

Mr. Marat Khaitbaev writings and presentations recognized nationally and internationally, combine integrative engineering, theory, and practical working models for a technical progress approach to the development of American Industry.

This is the kind of individual the United States needs urgently at this time.

We need someone who understands the problems and the opportunities of the United States industrial development and cares about its future enough to offer fresh, insightful and innovative approach to rethinking the ideas that will produce a much-needed development to the innovative process itself.

A quick glance at Mr. Marat Khaitbaev curriculum vitae attests to an extraordinary professional engagement in the United States through his work with completely new concepts of development regarding potential products for the American export industry.

Marat Khaitbaev multidimensional ideas offer immediate solutions to difficult problems facing new products and technologies development in the United States today.

As an active development expert and theorist who has seen Mr. Marat Khaitbaev present his work on numerous endeavor and specific designs projects, I consider him to be the future of American innovative Interdisciplinary engineering.

It is critical that we recognize individuals of Mr. Marat Khaitbaev stature, with the talent, brilliance, experience, imagination, passion, and skills to strengthen our society's export conditions on the international market.

Mr. Marat Khaitbaev distinguished career as an interdisciplinary Design and Manufacturing specialist is a confirmation of his ability to continue to enrich the U.S.'s cumulative understanding of its industrial and innovative future.

Mr. Marat Khaitbaev ability to deal with innovative design, patent and licensing prognosis, and the Internet as forums for his long-term goal of changing innovative progress in the United States further strengthens his case as a versatile and agile individual with exceptional abilities in diverse the industrial development to affect change.

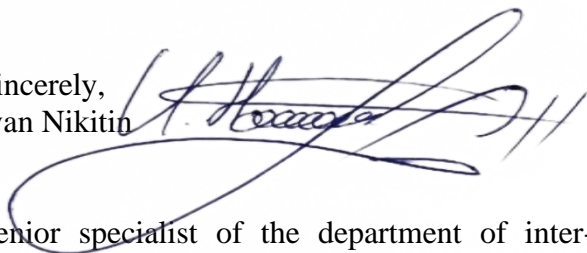

I submit this letter with the hope that Mr. Marat Khaitbaev case impresses you as much as he has convinced me and my colleagues nationally.

He is a gifted individual of extraordinary accomplishments and excellent credentials.

Mr. Marat Khaitbaev comes with my highest accolades and recommendations. I wholeheartedly endorse granting this individual the status he seeks.

Mr. Marat Khaitbaev is a gift to the United States.

Sincerely,
Ivan Nikitin

Senior specialist of the department of inter-university relations at the Bonch-Bruевич Saint Petersburg State University of Telecommunications
